

# **ARGE Conference 2023**

## **CONCLUSION**

15<sup>th</sup> September 2023

Denis Schnoebelen (ARGE Chair)

**Thanks to all our speakers**

**Each Year ARGE, your federation grows stronger, and is more visible :**

**ARGE is well recognized by the European commission, and other European actors,**

**ARGE is close to the hearth of EU decision makers.**

- **ARGE is the place to bring you advise and helps for tasks as for example EPD today, BIM and Lead reduction tomorrow,**
- **ARGE is also the place to share good practices between countries as for example the Master-keys system data protection guideline launched and shared by DHF the UK association, or the preliminary BIM works by UNIQ the French association.**

**One of ARGE's main missions is also to bring you strategic information on the European level, and to be your watchtower, helping you for strategic decisions.**

**This task is becoming more complex, due to the profusion of information coming from everywhere including social medias.**

**Therefore, ARGE is adapting its organization and creating a steering committee on digitalization which is the next big challenge for industry.**

**So you can trust ARGE to meet the challenges ahead!**

## CONCLUSION AND THANKS

**Thank you!**

**SEE YOU NEXT YEAR  
IN MILANO**
