

«The new Construction Product Regulation – Overall consideration »

Frédéric DUCLOYER – CEN/TC 33 Chairperson
UNM Managing Director

Questions you make ask as a manufacturer, as a standard maker, as ARGE member

Why a new CPR?

Which products within the product family of locks and building hardware will be affected ?

Will the new CPR speed up the standardisation process (hEN)?

Timing of implementation?

What are the main differences of the future CPR compared with the current CPR?

Issues related evaluation of Regulation 1025 on European Standardisation?

Why a new CPR?

 **Ensure the free circulation of Construction Products within the Single Market**

 **Embrace new broader policy priorities (European Green Deal)**

 **Speed up the use of digital technologies in construction ecosystem**

Will the new CPR speed up the standardisation process (hEN)?

Not directly

Main legal issue regarding standardisation process: outdated Mandates from EC to CEN

New CPR

CPR Acquis

a well-functioning internal market for construction products and the objectives of the European Green deal

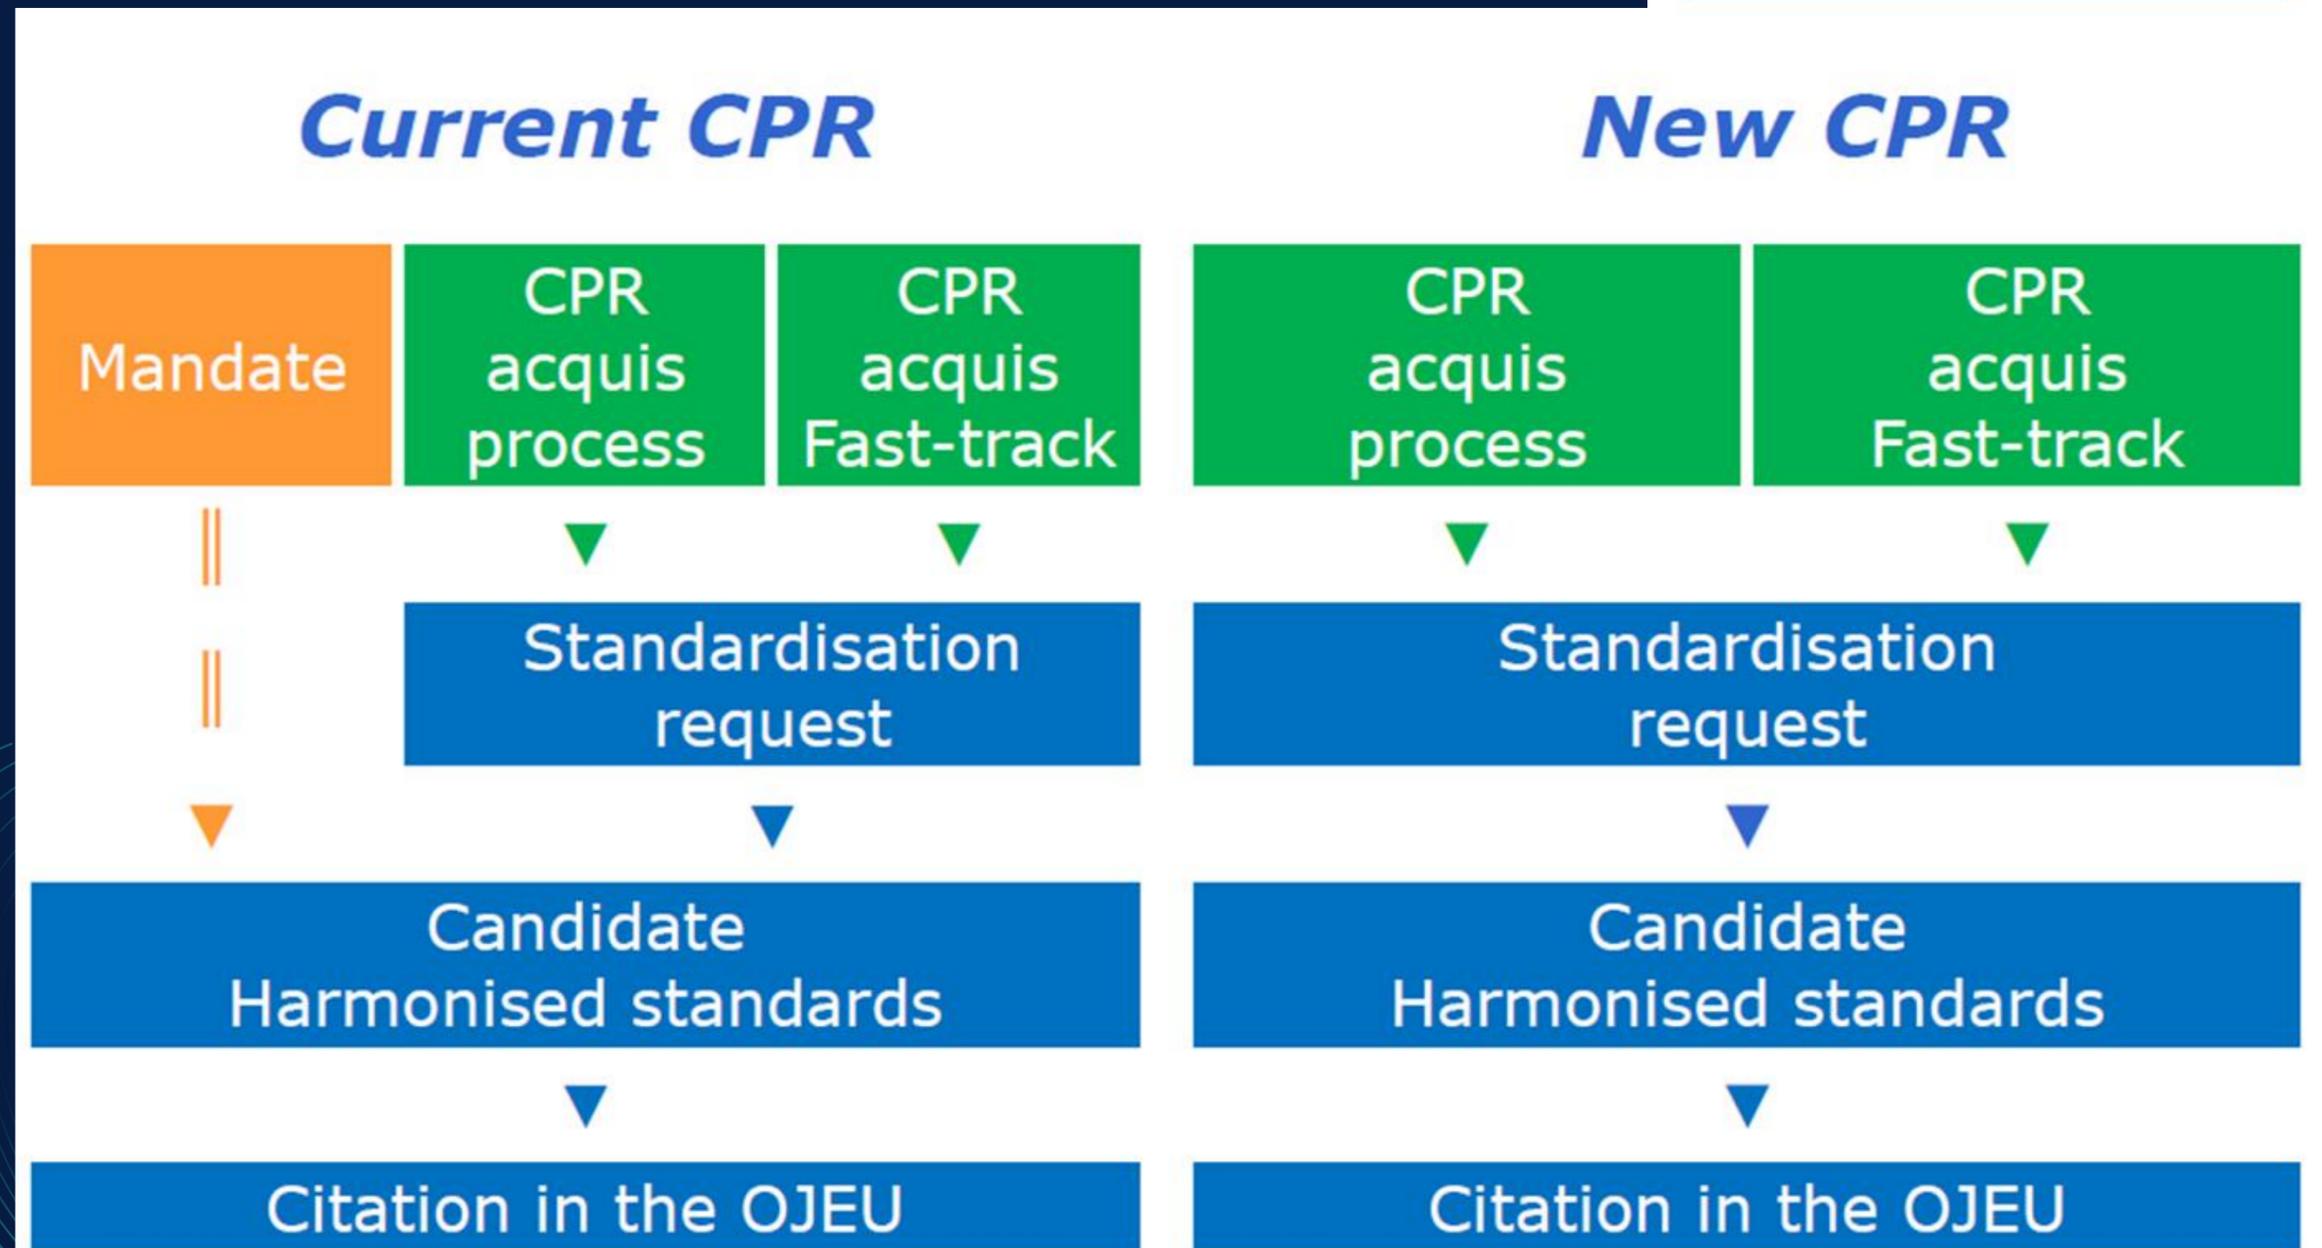

Transparent
Comprehensive
Future oriented

European Commission

Standardisation

i. Routes for preparation of hENs under the CPR Mandates

What are the main differences of the future CPR compared with the current CPR?

6 M

➤ More products

➤ More environment

➤ More digitalization

➤ More declarations

➤ More pressure on CEN

➤ More delegated acts

More products

- A wider definition of a Construction Product: re-used products, 3D printed products
- « Key parts » of products

More environment

- BRCW n°7 (Emissions into the outdoor environment of construction works) & n°8 (Sustainable use of natural resources of construction works >> declaration of performance)
- Inherent product environmental requirements >> declaration of conformity

More digitalization

- Digital Product Passport (DPP)
>> make sure the information will be available along the supply chain
- Complaint portal and market surveillance

More declarations and more assessments

- Declaration of performance
>> essential characteristics related to BRCW
- Declaration of conformity
>> products requirements established by delegated act
- AVCP 3+ for sustainability

More pressure on CEN

- ▶ Harmonised standards vs Common specifications

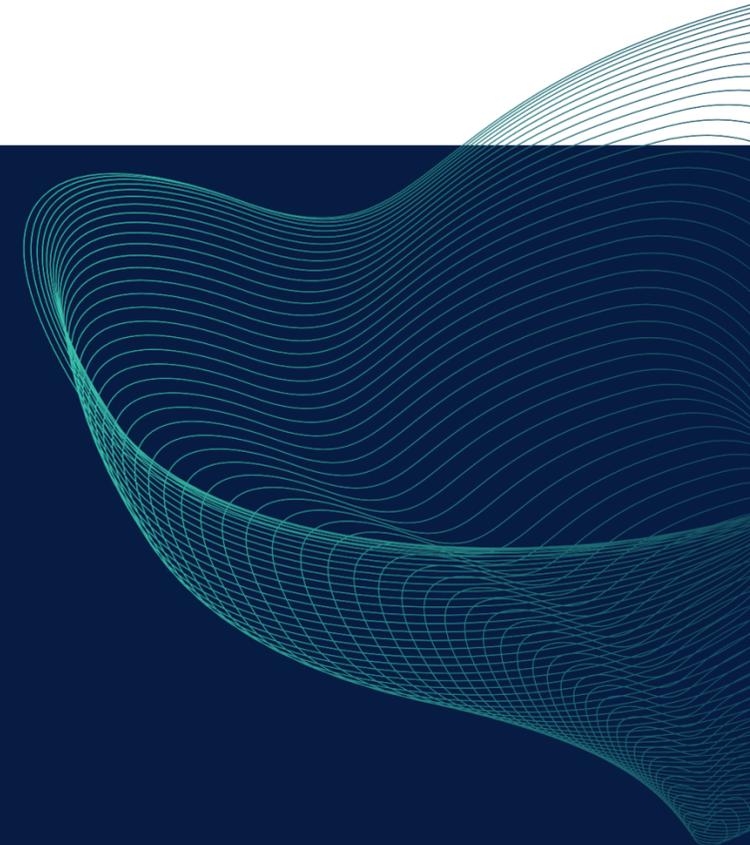

More delegated acts

- ▶ Complement, supplement, implement the CPR

Examples:

- establish product requirements
- establish minimum performance requirements on sustainability in public procurements
- ensure availability of spare aprts
- establish the DPP

Which products within the product family of locks and building hardware will be affected, in which way ?

Scope of the future Request of Standardisation: status quo

Timing of implementation

Publication of the new CPR

- end of september 2024: final english version
- october 2024: adoption by the European Parliament and European Council
- november: publication on OJUE

Repeal of the old CPR: 15 years after (2039). Coexisting period.

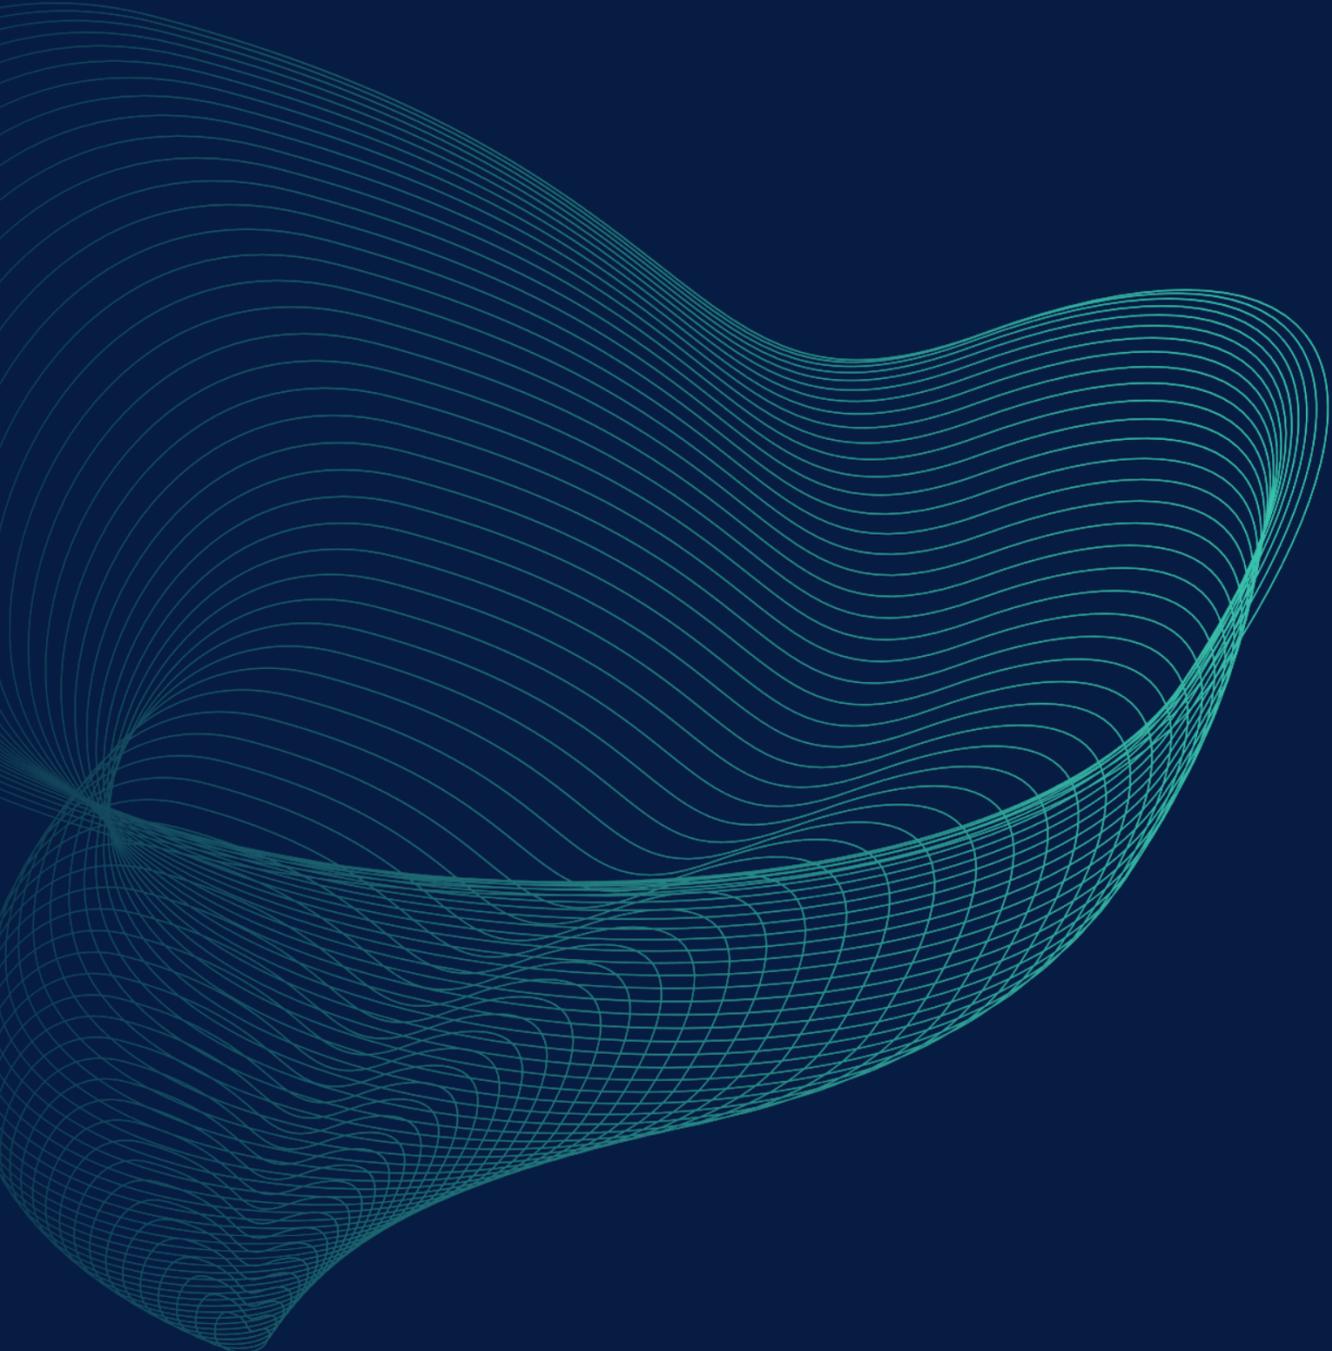

In practical, for manufacturers: entry into force when hEN is published – mandatory 12 months after citation on OJEU

2025-2028: work program for the establishment of the delegated acts

Evaluation of Regulation 1025 on European Standardisation

- Preserve a unique public/private partnership
- Reduce the time delivery of standards developed at the request of the Commission
- Strong alignment with international standards

**Thank you for
your attention!**
